

Group Psychology and Group Psychotherapy

Process for Developing Postdoctoral Competencies

2017

The members of the Council were notified of the task and the following materials were distributed to the Council: The letter and directions for developing the competencies, the 2005 postdoctoral model program, the clinical psychology and family psychology postdoctoral models downloaded from COS website, and The GPGP Taxonomy. It was decided to form a work group (Brown, Gross & Leforge) to develop the draft competencies which were then distributed to Council members for their review and input. The work group met vis Zoom and email to develop the draft. Changes were suggested and the draft was modified. COS had requested that the draft be sent to them for review and this was submitted on June 1. They suggested additional modifications and the work group incorporated these suggestions into the final draft which was submitted to COS on June 25, 2017.
